

Green Competences for Green Jobs

GT-003.01 Green Competences for Green Jobs - Overview

As greening economy requires a workforce with adequate green skills, TVET plays an important role in the transformation process towards sustainable development. The participants will understand the concepts of green economy, green skills/competences and green jobs. They will learn how to identify green competences and get to know a framework structure for a training module on cross-occupational green basic skills.

Learning outcomes

On completion of the training, participants

- are able to name policies, strategies and concepts on green economy, green skills and green jobs
- are able to describe approaches and examples on implementing green competences in the TVET system
- can list selected teaching methods within an action-oriented approach
- are able to discuss different methods to assess green competences
- are able to explain an (example) training module on basic green competences

Contents

- Inclusive green economy in the context of SD
